

MISSION OUTREACH HELPS TO EXPAND OPERATING ROOMS FOR HOSPITAL IN LIBERIA

Hospital Sisters Mission Outreach (HSMO) is proud to collaborate with Hands of Hope Foundation (HOHF) to support the new surgical wing project at JFK Memorial Medical Center in Monrovia, Liberia. Dr. Jerry Brown, CEO of JFK Memorial, is working closely with the Ministry of Health to elevate JFK Memorial to be the “Hospital of Choice” for patients and talented professionals in Liberia. Dr. Brown is committed to health and wholeness for Liberia, a country that has survived devastating civil war, poverty and disease. He is no stranger to challenges. Dr. Brown’s dedication and courage during the Ebola crisis earned him a place among Time Magazine’s Persons of the Year for 2014. Mission Outreach is helping Dr. Brown to meet the challenges at JFK Memorial. The new equipment provided by Mission Outreach will allow JFK Memorial to bring health to tens of thousands.

JFK Memorial has built eight new operating rooms as part of their renovation plan. Mission Outreach is working closely with Dr. Brown to equip the surgical wing with medical technology and supplies. In January 2018, Dr. Brown visited HSMO, Springfield, IL, met with the Mission Outreach Recipient Services team. The Mission Outreach team was inspired by Dr. Brown’s history and his future plans for JFK Memorial. The first container shipment which included: a portable x-ray, electrosurgical units, OR lights, patient monitors and defibrillator was shipped on October 24, 2019.

Mission Outreach, HOHF and Sisters of the Blessed Virgin Mary will support a second 40-foot shipping container that will be sent to JFK Memorial early in 2020.

“Hospital Sisters Mission Outreach has assessed, prepared and shipped \$215,797 worth of biomedical equipment to Tanzania, Liberia, Bolivia and Pakistan between October 2019 to December 2019”

TANZANIA

LIBERIA

BOLIVIA

PAKISTAN

EQUIPMENT NEEDED (the most requested items by priority)

- Anesthesia machine
- Diagnostic ultrasound with probe
- Electrosurgical unit
- EKG unit
- Patient monitor
- Sterilizer
- Defibrillator
- Infant Incubator
- Infant warmer
- Phototherapy light
- Fetal monitor
- Hospital beds
- OR table

Advancing the Mission

The need for equipment and support in low-resource countries far exceeds our current inventory. Mission Outreach is asking our hospital partners to ask manufacturers to direct trade-ins to meet the needs of our international partners. We appreciate all your efforts. Please remember to:

...Don’t delay. Your donated equipment will be assessed, prepared and shipped quickly. We have many international partners waiting for equipment.

...Make sure equipment is complete with cords, manuals, cables and accessories
